

>> PLEIN SUD Clay Roofing Tiles

The Gelis Plein Sud tile is produced at Léguevin in the Toulouse region. A strongly profiled clay tile, the Gelis Plein Sud has a coverage of 10 tiles per m² and replicates perfectly the traditional appearance of the Canal tiles of the South – with the added benefit of the technical advances enjoyed by the latest generation of interlocking tiles.

Generous horizontal and vertical tolerances make it straightforward to lay even on complicated roofs where gauging variations may occur. The Plein Sud is supported by a wide range of matching accessories including a dry-fix option. Available in 9 colours – solid, pastel and weathered all formulated to merge perfectly with the varied roofscapes of southern France.

This clay tile, as with all made by Imerys Roof Tiles, bears the hallmark of distinction of a world leader supported by technical excellence at all 13 manufacturing locations.

Main Characteristics

Double interlocking tile	Laid in line
Length overall ≈ 480 mm	Weight per m ² ≈ 44 Kg (10 tiles per m ²)
Width overall ≈ 316 mm	Variable gauge ≈ 392 mm ± 12 mm
Unit weight ≈ 4,4 Kg	Working width ≈ 231 mm to 258 mm
Coverage per m ² ≈ 10 (gauge of 392 mm)	
Number per pallet : 180	

COLOURS

Natural red

Paysage

Littoral flammé

Tradition

Vieux Pastel

Rustic Brown

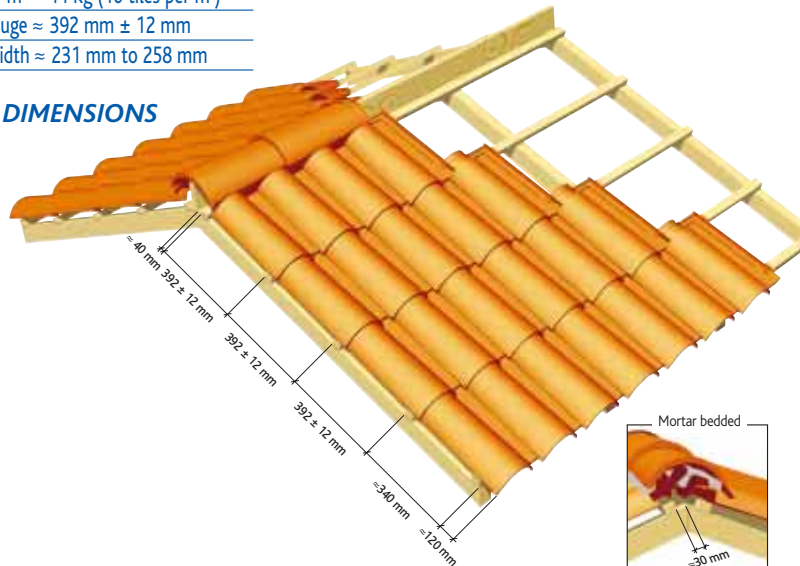

Terroir

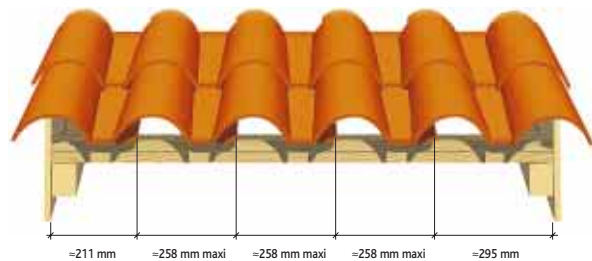

To minimise the effect of minor colour variation in the fired product it is advisable to mix tiles from 3 different pallets.

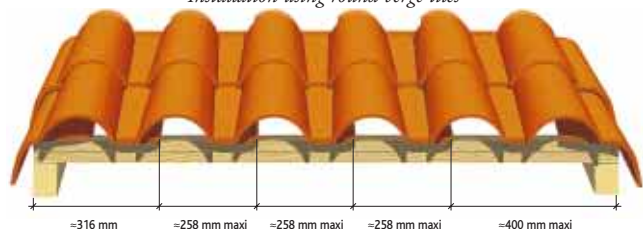

DIMENSIONS

Installation without round verge tiles

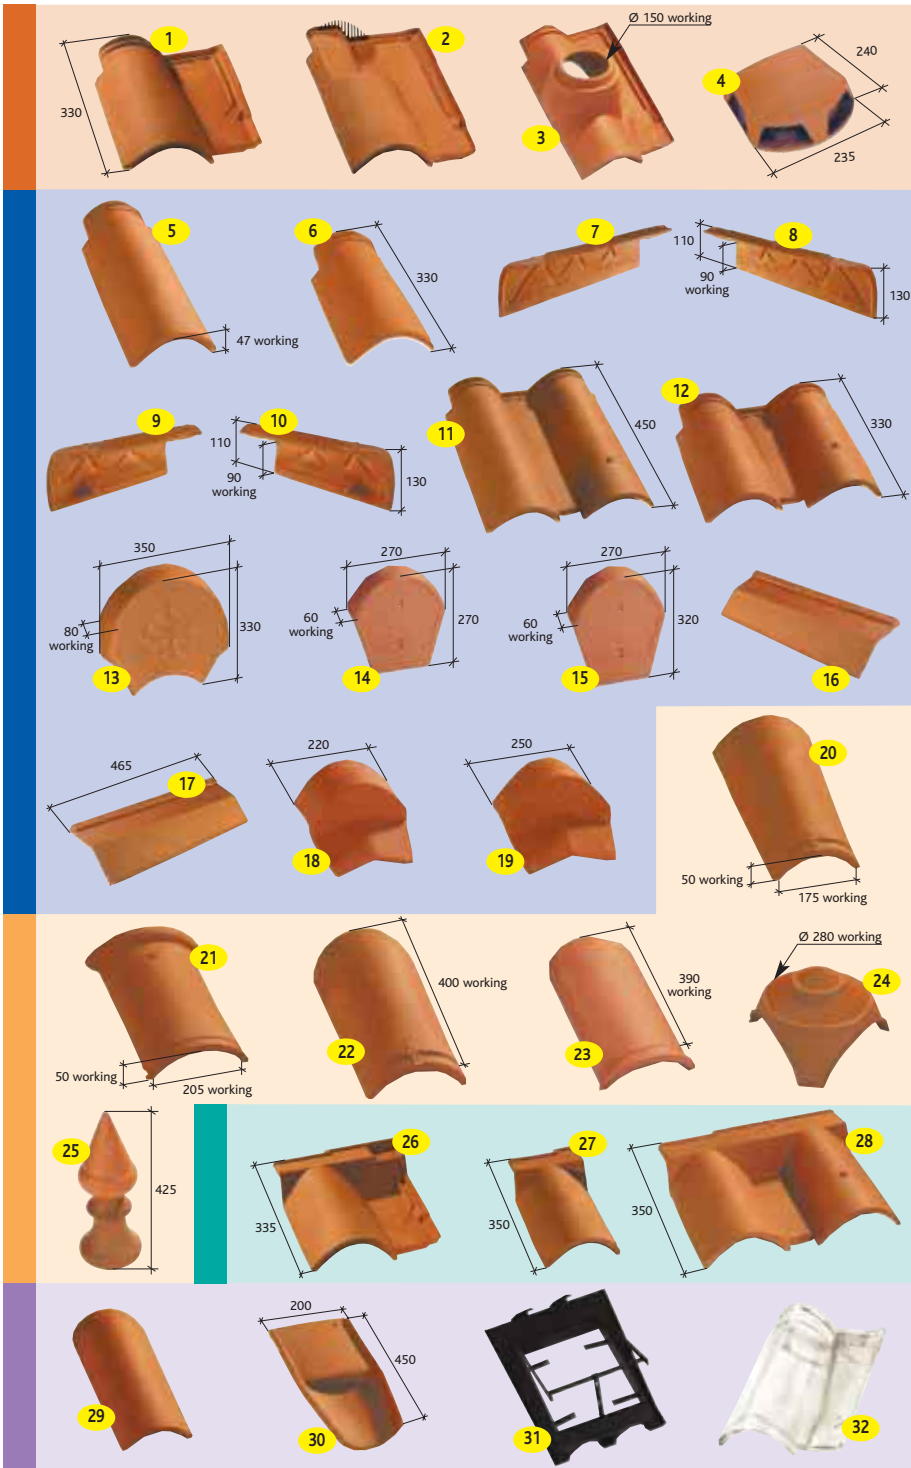

Installation using round verge tiles
